## MediGen

MediGen range of products are made of polypropylene or polyester. While MediGen polypropylene nonwoves provide more softness and comfort, polyester MediGen nonwovens provide the advantage of Gama sterilizability, higher temperature and abrasion resistance.

MediGen products made of spunbond and meltblown fibers are used where higher water repellency is needed.

**MediGen roll goods are available in white, blue and green colors and can be used in the following products and applications:**

- Examination gowns
- Caps, masks, shoe covers
- Bed linens
- Underpads
